## About Moonshot CVE

Moonshot CVE is a London-based social enterprise specialising in countering violent extremism (CVE), misinformation, and other public safety issues. We use data-proven techniques to respond to violent extremism effectively. Our work ranges from software development and digital capacity-building to leading global counter-messaging campaigns.

## About the role

We are seeking a subject matter expert with experience in West Africa. The post holder must be fluent in French and have a good command of English. Additionally, Bambara fluency is highly desirable. The role will include the following responsibilities:

- Undertaking online research on COVID-19 mis/disinformation narratives disseminated among local communities, in French and Bambara languages.
- Collating identified COVID-19 mis/disinformation narratives in Mali sourced from online and social media platforms and building a detailed database of online content and indicators relevant to the West African context.

## Requirements

- Knowledge of mis/disinformation or related subjects in the West African region (specific familiarity with Mali is desirable).
- Experience in open source research on social media platforms and other platforms.
- Fluency in French and working proficiency in English. Bambara fluency is highly desirable.
- Strong organisational skills, detail oriented, and ability to work to tight deadlines.
